PROFESSIONAL SUMMARY

Data Analyst who has cut manual review time by up to 40% and report generation time by 40% through SQL, Python, and Power BI-driven automation across fintech compliance and operations environments. Skilled in ETL pipelines, KPI dashboards, data modeling, forecasting, anomaly detection, risk scoring, stakeholder reporting, and GDPR-aligned data governance. Converts raw business data into reliable dashboards, scalable reporting workflows, and decision-ready insights that improve efficiency, compliance visibility, and operational performance.

SKILLS

Business Intelligence, Data Analysis, KPI Reporting, Executive Dashboards, Operational Reporting, Data Visualization, Stakeholder Reporting, Decision Support, SQL, T-SQL, Python, Pandas, NumPy, Power BI, Tableau, Excel, DAX, Power Query, PostgreSQL, MySQL, Git, GitHub, ETL Pipelines, Data Modeling, Data Cleansing, Data Validation, Data Quality, Reporting Automation, Workflow Automation, Audit Trails, Predictive Modeling, Forecasting, Regression Analysis, Clustering, Anomaly Detection, Risk Scoring, Statistical Analysis, Fintech Compliance, Identity Verification, Retail & Operations Analytics, GDPR-Aligned Governance

EXPERIENCE

Data Analyst, Confidential Agri-Retail Venture (early-stage, name withheld)

India | Jul 2026 – Present

- Contributed to a data-driven operations platform managing sales, inventory, product, pricing, and customer data for a retail venture.
- Built performance dashboards to monitor product movement, stock availability, margins, and purchasing decisions.
- Used business data to improve visibility into demand trends, pricing gaps, inventory planning, and operational decision-making.

Business Data Analyst, Confidential Fintech Compliance Firm (name withheld under NDA)

UK | Sep 2024 – Dec 2025

- Designed scalable ETL pipelines for identity verification and compliance analytics, reducing manual review time by 30–40%.
- Built Python and SQL-based risk scoring and anomaly detection models to flag suspicious identity claims before compliance review.
- Developed Power BI dashboards for compliance, verification status, exception tracking, and operational KPIs, improving data access efficiency by approximately 30%.
- Optimized SQL queries and automated recurring reporting processes, reducing report generation time by 40%.
- Implemented GDPR-aligned data governance, audit trails, validation checks, and traceable reporting workflows to support defensible compliance monitoring.

Data Analyst, ASAP Data Solutions

Hatfield, England, UK | Jul 2021 – Nov 2022

- Built interactive Tableau and Power BI dashboards for business stakeholders, reducing data turnaround time by 25%.
- Optimized SQL scripts, joins, and database queries, reducing execution time by 20% and improving reporting performance.
- Delivered statistical forecasting and trend analysis initiatives that improved demand-prediction accuracy by 18%.
- Created data validation and quality-control workflows, achieving 100% validation accuracy across critical reports.
- Partnered with business users to gather requirements, define KPIs, and convert reporting needs into dashboard and analytics solutions.

Junior Data Analyst, Accumed Software Solutions Pvt Ltd
Hyderabad, India | Feb 2019 – May 2020

- Built inventory tracking dashboards and operational reports that reduced stock-management issues by 25%.
- Automated data loading using Shell Scripts and optimized T-SQL queries to resolve long-running database processes.
- Analyzed process and performance data for operational teams, contributing to a 20% improvement in workforce productivity.
- Supported reporting, data extraction, data cleansing, and dashboard maintenance for recurring business intelligence requirements.

Team Lead (Part-Time, Concurrent), Range Distribution Centre
UK | Apr 2021 – Apr 2026

- Led a team within a distribution centre operation on a part-time basis for 5 years, running concurrently with data analytics roles and stealth data analyst projects.
- Managed shift scheduling, workflow allocation, and performance coordination for a distribution team, ensuring throughput and accuracy targets were consistently met.
- Applied data-driven decision-making to floor operations, using tracking sheets and basic reporting to flag bottlenecks and improve handling times.

PROJECTS

Indian Grain Market Analysis — SQL · Python · Power BI (github.com/Kalyanpoladi)

- End-to-end analysis of mandi prices, production, and export trends from public government data — SQL data modeling, Python trend analysis, and interactive Power BI dashboard.

EDUCATION

MSc in Data Science | Cardiff Metropolitan University, UK | 2020 – 2023

B.Tech in Computer Science | SR University, India | 2015 – 2019

Associate Degree in Entrepreneurship | Indian School of Business, India | 2017 – 2019

CERTIFICATIONS

Microsoft PL-300: Power BI Data Analyst — In preparation (target: 2026)

AWARDS

- Winner — Startup India, Telangana Yatra (2018)
- Top 3 Innovator — State Innovation Technology Program (2019)
- Top 10 Innovator — Agricultural Technology (2019)
